ecobreed
IMPROVING CROPS

Funded by European Union
Horizon 2020
Grant agreement No 771367

Task 2.1 Screening of genetic resources and breeding material (M13-48)

Twenty genotypes per partner of winter common wheat are multiplied by the respective project partner.

Task 2.1 Screening of genetic resources and breeding material (M13-48)

BOKU multiplies in 2019 winter wheat material ($n=20$) from LIVESEED partners which will be included in the forthcoming observation & evaluation trials

Task 2.1 Screening of genetic resources and breeding material (M13-48)

30 (MTA-ATK) + 33 (UNITUS) genotypes of winter durum wheat were sown already in observation plots as enough material was available. The trials are sown at MTA-ATK, UNITUS (+3 Syngenta „bio“ checks; +6 „engineered“ lines) and BOKU (+3 Austrian check varieties).

ecobreed
IMPROVING CROPS

Funded by European Union
Horizon 2020
Grant agreement No 771367

Task 2.2 AMF-compatibility evaluation (M13-36)

Task 2.3 Allelopathic activity screening (M13-36)

Not started yet – seed exchange with UVIGO in May 2019 (GA Prague)

Task 2.4 Marker assisted selection (M13-48)

Common bunt resistance

First crosses at BOKU in 2017 to resistant lines → „backcrosses“ in 2018;
Marker check in November 2018 → identification of „heterozygous“ plants
and planting → second „backcrosses“ in winter 2019 → identification of
„heterozygous“ plants and planting in February 2019 (first round)

Resistance source	Number of QTL	QTL located on chromosomes	Resistance originating from

Task 2.4 Marker assisted selection (M13-48)

Common bunt resistance

Co-operation with LIVESEED

- exchange of material with Agrologica (Mariager, DK); testing 2019 in Tulln and Prague
- Gumpenstein Conference: A. Borgen, V. Dumalasova, C. Vollenweider, V. Weyermann, F. Mascher, H. Grausgruber
- COST proposal (incl. BOKU, CRI, NARDI)

Task 2.5 Development of new wheat germplasm for organic farming (M19-60)

MAGIC populations

- start of vernalization at MTA-ATK: 15 Aug 2018
- planting: 8 Oct 2018
- crossing in winter 2018/19; harvest February 2019

Task 2.5 Development of new wheat germplasm for organic farming (M19-60)

MAGIC populations: number of pollinated spikes & hybrid seeds

Glosa / NS Ilina – 3 (33)

Ursita / NS 40S – 3 (32)

Mv Kolompos / IS Laudis – 4 (0)

Mv Toborzo / PS Dobromila – 5 (0)

Ehogold / PS Dobromila – 3 (2) / 3 (15)

Ehogold / XT9-23 - 3 (15)

Arminius / XT88-5R – 3 (16)

Aurelius / Colonia – 3 (16)

Tobias / Colonia – 3 (12)

Spontan / Annie – 3 (10)

Spontan / Tobias – 3 (7) / 3 (9)

Wendelin / Viki – 3 (2) / 3 (4)

IS Laudis / Viki – 3 (13)

IS Laudis / Colonia – 3 (2) / 3 (1)

→ new crosses in the field in May 2019

→ Mv Toborzo replaced by Mv Karej

ecobreed
IMPROVING CROPS

Funded by European Union
Horizon 2020
Grant agreement No 771367

Task 2.5 Development of new wheat germplasm for organic farming (M19-60)

High protein crosses (incl. Gpc1 donor line)

- crosses scheduled for May 2019 at Martonvasar
- alternative crosses available at BOKU (& Fundulea ?)

Perennial wheat

- BOKU: multiplication of 5 bulks of perennial wheat obtained from Werner Vogt-Kaute (originally from Steve Jones, WSU)

ecobreed
IMPROVING CROPS

Funded by European Union
Horizon 2020
Grant agreement No 771367

Task 2.5 Development of new wheat germplasm for organic farming (M19-60)

Perennial wheat

→ RGA: multiplication of *Thinopyrum intermedium* accessions; testcrosses with *Triticum* accessions; October: multiplication of 22 wheatgrass accessions in pots – spring 2019: field multiplication
